

# Loreto Sisters

## Guidance on ensuring all religious, who are ministering with children in an external organization agree to follow effective safeguarding practice

It is important that where Loreto Sisters are ministering with children in an external organisation or another Church body, the province leader must have agreement with the sisters that they will follow the safeguarding practices of the external organisation or Church body.

The province leader should have written agreements in place for every sister who is ministering with children in an external organisation or another church body. This agreement should include:

- That the organisation for whom the member is ministering has safeguarding policies and procedures in place.
- That the member ministering in this external organisation understands that while they are working for that organisation, the safeguarding policies and procedures must be adhered to.
